### 1 OVERVIEW

**AIN16-C-2 Analog Input Module** is a module which has 16 channels of 4mA-20mA sensor input and 3 channels of speed sensor input. The 4mA-20mA data and speed data are transmitted to the master controller for processing via RS485 port. Different alarm threshold values can be set for each

sensor via master controller.

## 2 PERFORMANCE AND CHARACTERISTICS

- With 32-bit ARM based SCM, high integration of hardware and more reliable;
- Must be used with master controller together;
- RS485 communication baud rate can be set as 9600bps or 19200bps via dial switch;
- Module address can be set as 1 or 2 via dial switch;
- Wide power supply range DC(18~35)V, suitable to different battery voltage environment;
- 35mm guide rail mounting type;
- Modular design, pluggable terminal, compact structure and easy installation.
